QuoteCAD® Manufacturing 4

QuoteCAD® Manufacturing is the smartest choice for small businesses that require the basic and integrated functions of an Enterprise Resource Planning (ERP) System. QuoteCAD® Manufacturing provides out-of-the-box, base functions for functional areas like Manufacturing, Customer Relationship Management, and Supplier Chain Management.

Both economical, and user friendly, QuoteCAD® Manufacturing has the lowest learning curve, and it does not require a high degree of customization like the majority of existing ERP solutions.

Typical ERP implementation projects for enterprises can consume months and require a consulting team, and usually requires changes in existing business processes. QuoteCAD® Manufacturing provide for the basic out-of-the-box requirements for small businesses with a minimal setup time.

Its full featured structured products catalog can be linked to any technical documentation including PDF Datasheets, CMS IntelliCAD, SolidWorks, Inventor, SolidEdge, Alibre Design 2D, or 3D CAD drawings files.

New QuoteCAD® Manufacturing API now supports third-party developers to build plugin applications able to expand QuoteCAD® software features.

Additionally, it packs the brand new ETOOLBOX® CAD Viewer for Windows desktops allowing users the option to open *.dwg, *.dxf, *.dwf and *.dae CAD files.

What does QuoteCAD® Manufacturing provide?

• Access control - Management of user privileges for various processes, including developer access;
• Custom product structures based on sub-products, components and services assemblies, in-house built or supplied by multiple vendors;
